Risca Urban District Council

ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

for the year ended 31st December, 1951

To the Chairman and Members of the Risca Urban District Council.

Sir/Madam,

I have the honour of presenting my Annual Report as Medical Officer of Health for your District for the year ended 31st December, 1951.

SECTION "A"—

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area of the District (in acres)	4,195
Population 1951	15,131
Rateable Value	£53,201
Sum represented by one penny rate (estimated)	£192

Vital Statistics

Birth Rate per 1,000 of the estimated resident population	14.3
The Birth Rate for England and Wales	15.5
The Birth Rate for Monmouthshire was	16.5
Death Rate of Infants under 1 year of age per 1,000 live births	62
Death Rate per 1,000 of the estimated resident population	13
Death Rate for England and Wales	12.5
Death Rate for County of Monmouth	13.38
Infant Death Rate for County of Monmouth	43.1

Ages at Death of Children under 1 year

Under 1 week	7
1-4 weeks	3
4 weeks-1 year	4
	14

There are no special causes of sickness during the year which need reporting upon. The general conditions of health were good.

CAUSES OF DEATH

	M.	F.
Tuberculosis, respiratory	2	2
Tuberculosis, other forms	—	1
Syphilitic Disease	1	—
Diphtheria	—	—
Whooping Cough	—	—
Meningococcal Infections	1	—

Hyperplasia of Prostrate	4	—
Congenital Malformations	1	4
Other Defined and Ill-Defined Diseases ...	9	12
Motor Vehicle Accidents	1	1
All Other Accidents	10	3
Totals ...	114	85

Social Conditions.—The chief Industries carried on in this Area are coal-mining and its subsidiary industries, also steel manufacturing. There are also several stone quarries and brick works.

SECTION ' B '—

GENERAL PROVISIONS OF HEALTH SERVICES FOR THE AREA

1. Public Health Officers of the Authority. One Medical Officer of Health and one Sanitary Inspector (whole-time Officers).

2. Hospital Services. Hospital Services are administered by the Regional Hospital Board as and from 5th July, 1948.

The Monmouthshire County Council is responsible for administering the following services under Part III of the Act:—

- (a) Care of Mothers and Young Children.
- (b) Midwifery Services.
- (c) Health Visiting.
- (d) Home Nursing.
- (e) Vaccination and Immunisation.
- (f) Ambulance Services.
- (g) Prevention of Illness (Care and After-Care).
- (h) Domestic Help Scheme.
- (i) Duties under Lunacy and Mental Treatment and Mental Deficiency Acts.

SECTION " C "—SANITARY CIRCUMSTANCES OF THE AREA

1. Water Supplies

Complaints are received during the course of the year from various parts of the area with regard to the quantity and quality of the water supplied. The parts which seem to be affected particularly are Hill Street, Priory Street, Woodview Road and those situated on the higher levels.

This important matter has been discussed many times by the Council, but it appears that the real reason for the trouble is due to the fact that the Abertillery and District Water Board is unable to obtain the necessary amount of water to satisfy the needs of the whole area.

It is to be hoped that every effort will be made to ensure that in the very near future all parts of the district will be supplied with an adequate and pure supply of water.

2. Drains and Sewerage

There has been no important extensions to the sewerage and drainage system of the District during the year.

3. Rivers and Streams

No action was taken to check the pollution of rivers and streams in the area during the year.

4. Closet Accommodation

Particulars will be found in the Sanitary Inspector's Report.

5. Public Cleansing

There were no extensions or improvements during the year in the arrangements for public cleansing.

6. Sanitary Inspection of the Area

A classified statement of the premises visited, the defects and nuisances discovered and the action and result of action taken with regard to these will be found in the Sanitary Inspector's Report.

7. Shops

The shops in the area are periodically visited by your Sanitary Inspector and appropriate action taken to deal with any nuisances or defects discovered.

8. Smoke Abatement

No action was taken in reference to this paragraph.

9. Swimming Baths and Pools

There is one open-air Swimming Pool owned by the Council. This Pool is used to a great extent and is conducted in a very satisfactory manner.

10. Camping Sites

There are no camping sites in this area.

11. Eradication of Bed Bugs

20 houses were found to be infested with bugs. In each case complete eradication was effected. All cracks, crevices, woodwork, etc., were treated with the blow lamp and then sprayed with Zaldecide.

12. Schools

The Schools in the district were visited during the year and when defects were found they were reported to the Education Authority.

SECTION "D" — HOUSING

1. Inspection of Dwelling-Houses during the year

(1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	106
(b) Number of inspections made for the purpose ...	295
(2) (a) Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925	—
(b) Number of inspections made for the purpose ...	—
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	—
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found to be in full respects reasonably fit for human habitation ...	—

2. Remedy of Defects during the year without service of Formal Notices

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers	92
--	----

3. Action under Statutory Powers during the year

(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936 :—	
(1) Number of dwelling-houses which were rendered fit after service of formal notices	—
(2) Number of dwelling-houses in respect of which notices were served requiring repairs	—
(a) By Owners	—
(b) By Local Authority in default of owners ...	—

(b) Proceedings under Public Health Acts :	
(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	15
(2) Number of dwelling-houses in which defects were remedied after service of formal notices	15
(a) By Owners	15
(b) By Local Authority in default of Owners ...	—
(c) Proceedings under Section 11 and 13 of the Housing Act, 1936 :—	
(1) Number of dwelling-houses in respect of which demolition orders were made	4
(2) Number of dwelling-houses demolished in pursuance of Demolition Orders	—
(d) Proceedings under Section 12 of the Housing Act, 1936 :—	
(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made	—
(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement room having been rendered fit	—

4. Housing Act, 1936. Overcrowding

(a) (1) Number of dwellings overcrowded at the end of the year	68
(2) Number of families dwelling therein	102
(3) Number of persons dwelling therein	502
(b) Number of new cases of overcrowding relieved during the year	—
(c) (1) Number of cases of overcrowding relieved during the year	15
(2) Number of persons concerned in such cases ...	79
(d) Particulars of any houses becoming overcrowded after first relief	—

SECTION "E"—INSPECTION AND SUPERVISION OF FOOD

(a) **Milk Supply.**—Farms and Dairies have been regularly inspected and samples of milk taken and examined for bacterial content and for tubercle bacilli, under the various Milk and Dairies Orders. For details see Sanitary Inspector's Report.

(b) **Meat and Other Foods.**—For action taken with regard to Meat and Other Foods, Slaughter Houses, etc., see Sanitary Inspector's Report.

(c) **Adulteration.**—No special action was taken under these Acts and Regulations.

(d) **Chemical and Bacteriological Examination of Food.**—Ample use is made of the facilities provided by the County Laboratory.

(e) **Nutrition.**—No action has been taken under this Section.

SECTION "F"—PREVALENCE OF, AND CONTROL OVER INFECTIOUS DISEASES

All cases of notifiable diseases are visited by your Sanitary Inspector. If necessary, arrangements are made for the removal of patients to an Isolation Hospital.

There were 35 cases of Scarlet Fever as compared with 20 during the previous year.

There were no cases of Cerebro Spinal Meningitis notified during the year.

Diphtheria Immunisation

Number of children immunised during the year ... 2,192

There were no cases of Diphtheria notified during the year.

Risca Urban District Council

SANITARY INSPECTOR'S ANNUAL REPORT

For the Year ending 31st December, 1951

To the Chairman and Members of the Risca Urban District Council
Mr. Chairman and Members,

I have pleasure in submitting to you my Annual Report on the work accomplished by the Public Health Department for the year ended 31st December, 1951.

Statement of Sanitary and Housing Work completed during the year

Exterior

Roofs repaired and made weatherproof ...	...	...	...	...	56
Eavesgutters repaired or renewed ...	...	...	...	...	36
Rainwater pipes repaired or renewed ...	...	...	...	...	24
Chimney stacks repaired ...	...	...	...	...	8
External walls rendered or repointed ...	...	...	...	...	15

Interior

Windows repaired or renewed ...	...	...	...	...	33
Floors repaired or renewed ...	...	...	...	...	20
Walls replastered ...	...	...	...	...	28
Fireplaces repaired or renewed ...	...	...	...	...	10
Staircases repaired or renewed ...	...	...	...	...	2
Doors and frames repaired or renewed ...	...	...	...	...	7
Window cords provided and fixed ...	...	...	...	...	41
Ceilings replastered ...	...	...	...	...	14

Drainage

Drains repaired ...	...	...	...	...	3
Inspection Chambers repaired and covers fixed ...	...	...	...	...	7
New wash-up basins provided and fixed ...	...	...	...	...	5
Drains cleansed ...	...	...	...	...	14

Waterclosets

New pedestal pans provided and fixed ...	...	...	...	...	10
New flushing cisterns provided and fixed ...	...	...	...	...	10

Seats repaired or renewed	6
Roofs of W.C. compartments repaired	6
Walls rebuilt or repointed	7
Doors repaired or renewed	4

Inspection of Meat and Other Foods

The butchers' shops of the district were visited during the year and the meat examined. As you are aware, the slaughterhouses are closed and the meat for the area comes from Newport.

Many visits were paid to the food retail shops, very often at the request of the trader.

The following are particulars of meat and other foods surrendered during the year.

128 lbs. English Beef	Bone Taint
19 $\frac{3}{4}$ lbs. English Beef	Bruising
20 lbs. Imported Beef	"
13 $\frac{1}{2}$ lbs. Bacon	Bone Taint
7 lbs. 9 ozs. Chitterlings	Decomposition
5 stones Fish	"
4 lbs. Cheese	"
1 Beasts' Head	"
45 lbs. Butter	Tainted
72 jars Mincemeat	Fermentation
110 tins Milk	Blown
15 tins Peas	"
15 tins Ham	"
66 tins Tomatoes	"
38 tins Pork Luncheon Meat	"
15 tins Beef Loaf	"
41 tins Beans	"
25 tins Fruit	"
3 tins Fish	"
6 tins Jellied Veal	"

The following information was received from the Chief Sanitary Inspector to the Newport Borough for the year 1951.

Number of animals slaughtered and inspected ...	40,501
Amount of meat condemned as unfit for human consumption	152,486 lbs.

Ministry of Agriculture and Fisheries, Rodent Control Schemes

During the past year the Rodent Control Operative has been very active in carrying out treatments of infested premises as prescribed by the Ministry of Agriculture and Fisheries. 345 private and 37 business premises, of all descriptions, were dealt with and very satisfactory results were obtained. In addition the Pontywain refuse tip was baited on three occasions.

The method of baiting consists of prebaiting on four consecutive days, poisoning on the fifth, and the poison left and any dead bodies are picked up on the sixth day.

Two maintenance treatments of the sewer manholes were carried out during the year. The treatment consists of baiting on two days and poisoning on the third day.

From past experience I can say that the sewer treatments have the effect of keeping the degree of infestation at a safe low level and this has a correspondingly beneficial effect upon the degree and severity of surface infestations.

I am pleased to report that the Rodent Control Operative is most enthusiastic and conscientious and is doing a most important job in a very praiseworthy manner.

A very good sign too is the growing consciousness of this problem amongst the general public and we find that apart from the infestations found during routine inspections, people are becoming more co-operative in quickly reporting complaints of infestations with rats and mice.

Milk Supplies

During the year much time was devoted to the carrying out of the legislation contained in the Milk (Special Designations) (Raw Milk) Regulations 1949, The Milk (Special Designations) (Pasteurised and Sterilised Milk) Regulations 1949, and the Milk and Dairies Regulations 1949.

The Milk and Dairies Regulations 1949 make a distinction between dairy farmers, i.e., milk producers, and milk distributors, i.e. persons trading from premises other than a dairy farm, and between dairy farms and other premises at which milk is handled.

The registration of dairy farmers and dairy farms under the Regulations is the responsibility of the Ministry of Agriculture and Fisheries and the registration of milk distributors and other dairy

premises is the responsibility of local authorities. This means that Officers of Local Authorities no longer have power to visit dairy farms to inspect conditions under which milk is produced.

During the year 42 samples of milk were taken and submitted to the laboratory at the County Hall for bacteriological analysis. Of these, 40 were found to be satisfactory, but the remaining two failed to pass the test required.

When samples of raw milk are found to be unsatisfactory, copies of the reports are forwarded to the Milk Production Officer of the Ministry of Agriculture and Fisheries so that the farms producing the milk can be visited with a view to effecting an improvement.

Ice Cream (Heat Treatment) Regulations, 1947

A great deal of time was devoted to ensuring that manufacturers and retailers of ice cream complied with the above-mentioned Regulations. This was particularly the case where the hot mix method of manufacture is used.

This method means that after the ingredients have been mixed the mixture shall not be kept for more than one hour, above 45°F. before being raised to a temperature of not less than 150°F. for 30 minutes or 160°F. for 10 minutes. It shall then, within 1½ hours be reduced to not more than 45°F. and there kept until freezing is begun. Ice cream must not be sold unless kept at a temperature not exceeding 28°F.

Twenty-seven samples of ice cream were taken and submitted to the laboratory at the County Hall for bacteriological analysis.

The reports on the samples were as follows:—

Grade 1—13: Grade 2—11: Grade 3—1: Grade 4—2.

Infectious Diseases

Where found to be necessary, all cases of infectious diseases were promptly visited and every effort made to trace any possible source of infection.

Advice as to the precautions necessary to be taken was given to the householder. Every house is thoroughly sprayed or fumigated when the Doctor in attendance certifies the patient to be free from infection.

Shops Acts

The shops in the district were visited periodically in order to ensure that the above-mentioned Acts are being complied with.

Whilst carrying out food inspection, advantage was taken to inspect the conditions under which the employees, if any, are working.

Particular attention was paid to cleanliness, sanitary conveniences and their condition, washing facilities, and as to whether seating accommodation was provided for female employees.

With regard to the above-mentioned matters, I can report that these requirements are being observed by the shopkeepers generally.

Verminous Premises

During routine inspections of both private and Council properties, care is taken to ascertain any infestation with vermin.

Any cases which are found in this way and those which are reported by tenants, are dealt with by spraying with an insecticide.

I am, Your obebient Servant,

GLYN M. JENKINS,

Sanitary Inspector.
